

I think you should reject NAB's petition 04-160. XM Radio gives us more choice and the freedom to listen to what we want, and isn't that the point, people having a choice. I subscribe to XM Radio and still listen to commercial radio, but limiting what XM can broadcast would be wrong. The service they provide should give others a clue to what the public want and try to keep up with the times with fair and equal competition. Thank you, Frank Feliciano
